The Relationships and Evidence: Consciousness,
Science, Spirituality, and Nature of the Universe

The Many Modalities of Healing
Notes by Jerry Gin

HEALING: SOME COMMONALITIES

- ◉ Distance does not matter (non-locality)
 - Indicates our connectedness
- ◉ Involvement with subtle energy: Qi, Touch, Torsion waves, The Connection, Reiki
- ◉ Connection with Higher Source
- ◉ Many modalities work:
 - Color, angles, sound, light, shapes - emitting BG3 energies? Torsion energies?
- ◉ Being a healer may be a universal human ability
- ◉ Some techniques are informational: communicate from subconscious to conscious mind (EFT, BodyTalk)
- ◉ Combinations of modalities? Radionics, Radiesthesia
- ◉ Co-creation by belief: Placebo effect, Greg Braden video “it is healed” results in healing; Matrix energetics - collapsing the wave:
https://www.youtube.com/watch?v=VLPahLakP_Q

SPIRITUAL CONNECTION IN HEALING

- ◉ Edgar Cayce on Healing:

<http://www.edgarcayce.org/are/edgarcayce.aspx?id=4629&terms=principles%20of%20healing>

- All healing comes from the infinite -- that is, from attunement and harmony with our spiritual source. The infinite is just as accessible and available in the visible, physical world as it is in the invisible realm.
- At the same time, each person must take responsibility for his or her own healing process. No one can simply sit back and wait passively for healing to occur.

- ◉ Commonality: Most healers state healing comes from a divine source and that they do not know how the healing is accomplished

- Eric Pearl, Jane Katra, etc.

A SPIRITUAL HEALING MECHANISM

- ◉ Manifesting Michelangelo, by Joseph Pierce Farrell with Peter Occhiogrosso
- ◉ 5 Steps in manifesting healing changes:
 1. Step One - Look
 1. First step is discovering and unearthing your uniqueness, passion and sacred desires
 2. Step Two - Decide
 1. Once you've looked and decided on your particular passion or calling, it is time to do something about it
 3. Step Three - Connect
 1. Connect to a higher power (Source, Creator, the Field, the Divine, God)
 4. Step Four - Act
 1. To act means to put your decision into motion. Our thoughts (intentions, feeling, expansion of the heart beyond the physical body) create chain reactions in the external world
 5. Step Five - Manifest
 1. Bringing forth and making plain your dreams. You are more than you have been led to believe

TORSION FIELDS = SUBTLE ENERGY FIELDS

- ◉ Kozyrev: Change in entropy causes change in density of time; change is radiated away in a twisting wave carrying “torsion” which will be absorbed at some other location - causing an entropy change in the opposite direction at the point of absorption
 - Human thought/emotions and consciousness generate torsion
 - All Matter absorb and radiate torsion waves/fields
 - Waves are super-luminal (move billion times faster than light)
- ◉ All electromagnetic and electrostatic fields accompanied by torsion field
- ◉ Torsion Waves: spiraling impulses traveling through the aether at billion times the speed of light. Caused by many types of events - e.g., movement of physical objects, conscious thought, etc.
- ◉ Tom Bearden - fundamental wave in the electromagnetic wave is a scalar wave.
 - Scalar wave is the wave that remains when two opposing electromagnetic waves cancel out the electric and magnetic components (like Tesla)

Through Brennan Healing Science, you will:

- Learn your unique life purpose
- Develop hara, the intention and ability to accomplish life goals
- Establish deep connection with inner spiritual guidance and fulfill your heart's true longings
- Promote physical healing of many disease conditions
- Restore a sense of well-being and emotional stability
- Clear and strengthen mental capabilities
- Learn the creative process from your Divine Core through the Hara and Aura into the physical world

The Human Energy-Consciousness System, or Human Aura

The Human Energy Field is the manifestation of the universal energy that is intimately involved with human life. It can be described as a luminous body that surrounds and interpenetrates the physical body, emits its own characteristic radiation and is usually called the "aura."

The auric field is a quantum leap deeper into our personality than is our physical body. It is at this level of our being that our psychological processes take place. The Human Energy Field is the vehicle for all psychosomatic reactions.

The physical body arises out of the energy field, thus an imbalance or distortion in this field will eventually cause a disease in the physical body that it governs. Therefore, healing distortions in the field will bring about healing in the physical body.

The Human Energy Field is composed of an infinite number of levels. We focus primarily on the seven lower levels throughout the four-year course of study in Brennan Healing Science. Each level penetrates through the body and extends outward from the skin. Each successive level is of a "higher frequency" or a "higher octave." Each extends out from the skin several inches farther than the one within it of lower frequency. The odd-numbered levels are structured fields of standing, scintillating light beams. The first, third, fifth, and seventh levels of this field are structured in a specific form. The even-numbered levels—the second, fourth, and sixth—are filled with formless substance/energy.

KINESIOLOGY - TOUCH FOR HEALTH

John Thie: <http://touchforhealth.us/about-us>

West meets East: energy balance

When Western chiropractic ideas regarding posture and muscle testing procedures are combined with Eastern energy-flow ideas of chi, or life energy, a new tool for the massage therapist or bodyworker becomes available.

The Touch for Health System encompasses the vitalistic world view that humans' natural birthright is to be able to use touch to activate their own bodies' natural recuperative powers, or energy. These natural recuperative powers are enhanced or inhibited by daily activities. In response to those activities, changes occur within muscles and skin—and the way we feel and function is affected as we become more, or less, vulnerable to injury and disease according to the balance of our energy. This energy may be called chi, as in the Chinese world view; ki, from the Japanese; prana, from the Indian; and innate intelligence in the Western chiropractic tradition. In each case we refer to the power of the intelligently designed human body to come into harmonious balance as a whole person.

KAIROS

<http://www.kairosterapy.com/>

ABOUT KAIROS THERAPY

Kairos therapy, is a form of 'energy healing', or 'laying on of hands', which is one of the oldest forms of healing known to mankind. Kairos therapists use the energy between their hands to bring about relaxation of both body and mind. With carefully placed hands, therapists can target and release deep layers of blocked emotion, and trauma, allowing them to surface and leave the body. Working in this way with a Kairos therapist, it is possible to reach a place of peaceful acceptance, allowing us to move forward with purpose.

HOW KAIROS WORKS

In Kairos, we use the natural Chi flow between our hands and work with it in specific directions and patterns to allow physical and emotional healing to take place. 'Chi' is the Chinese word for vital energy, a quality that Chinese medicine has long recognised as the life-force that flows through us, and which has a crucial role to play in our good health and well being. By combining the therapist's chi flow with your own, deep relaxation can occur allowing blockages to release, and trapped feelings to emerge and leave the body.

Emotional Freedom Techniques (EFT)

Homework: The Basic Recipe

1. **Determine your distress level** on a scale of 0 to 10: 10, 9, 8, 7, 6, 5, 4, 3, 2, 1, 0
2. **The Setup:** Repeat this affirmation three times, while continuously tapping the Karate Chop point on the side of the hand (large dot on hand diagram below)
"Even though I have _____ (name the problem), I deeply and completely accept myself."
3. **The Tapping Sequence:** Tap about 7 times on each of the energy points in these 2 diagrams. Take a deep breath between points.

4. **Determine your distress level** on a scale of 0 to 10 again. If it's still high, say:
"Even though I have some remaining _____ (problem), I deeply and completely accept myself."
5. **Repeat from Step 1** till your distress level is as close to 0 as possible.

HARMONIC DOWSING

Joachim Wippich

I have found that there are three distinct preparations I use to ready myself and my students for dowsing.

- 1** Invite both sides of your brain to join together with your heart. This is done differently for women and for men. Repeat the appropriate phrase.

MEN

*"I invite my right brain
and my left brain to join
together with my heart.
I invite my left brain and
my right brain to join
together with my heart"*

WOMEN

*"I invite my left brain
and my right brain to join
together with my heart.
I invite my right brain and
my left brain to join
together with my heart"*

I often repeat the phrase: "I am aware that all components of my divine being are active, present and functioning at 100%. This process of bringing your entire physical and spiritual being into harmony established the energetic connection required for accurate dowsing results. Checking to see if the connection is

- 2** Test with your dowsing implement (pendulum, rod(s), bobber, or physical form of dowsing) to verify that the joining of both sides of your brain with your heart is complete. You will know you are ready to move to the next step when there is a strong and steady "yes", or positive signal with your dowsing tool.

- 3** Whether you are dowsing for yourself or others, prepare yourself to be safe and receptive to the energetic messages. Effective dowsing addresses the basic ideas of who, what, when, where, why and how.

WHO I AM – followed by anyone else involved in your activity.
WHAT Inviting to come into 100% divine harmony with all disharmony.
WHEN Usually now, but sometimes you may go beyond this timing.
WHERE This universe, this earth, this home, this place...
WHY The particular reason to dowse at this time.
HOW By bringing I AM, or whatever the focus into 100% harmony.

BIOGEOMETRY

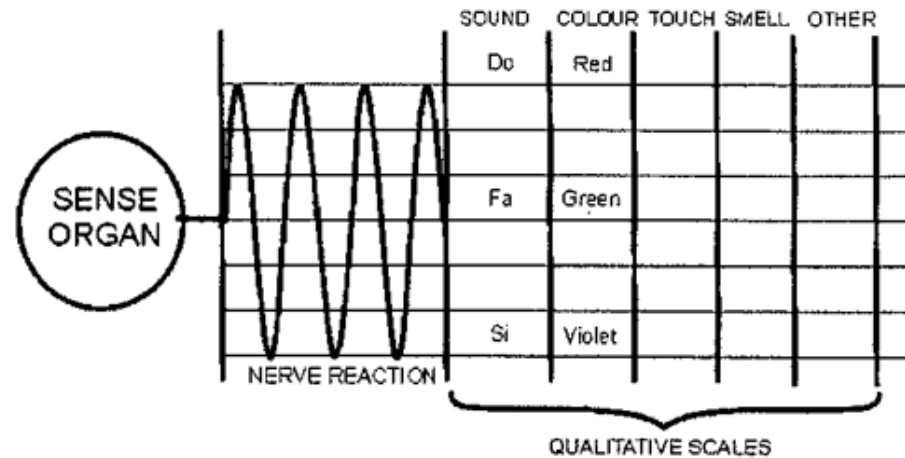

- “The science of establishing harmony between biological fields and their environment, through the use of design, language of color, form, motion and sound.” Ibrahim Karim
- Basis: Physics of Quality
 - Science deals with numbers (quantitative)
 - Nature deals with quality - color, sound, etc.
 - Use of shape, color, sound and other parameters to balance biological energy systems within framework of environmental energy interactions
- Harmonizing energy quality: Found in sacred power spots - 3 energy qualities labeled BG3
 - BG3 restores energetic balance within a living system when energy interactions disturb the balance (e.g., EMF)

BODY TALK

- ◉ Sensing disorder with body “talking” to practitioner, follow protocol to find primary problem
- ◉ Release problem with tapping to head and heart

RADIENTHESIA

- ◉ Use of physical dowsing
 - Pendulum moves in clockwise circle to indicate positive resonance
- ◉ Use of a witness to establish connection: saliva, blood, picture - something to establish link

RADIONICS

- ◉ Originally: Dr. Abrams - tapping of abdomen to detect disease. Found detection can occur with sticky sensation on a small plate of wood, plastic or paper. Use circuit with dial and resistors to detect disease rate/number
- ◉ Found machine not needed, just its schematic
- ◉ Place a witness on device to connect Radionics operator in touch with subject (blood, saliva, picture)
- ◉ Read rate from the various dials
- ◉ Subtract number for disease (its frequency) from 100,000
- ◉ Input new “broadcast” wave to create cure

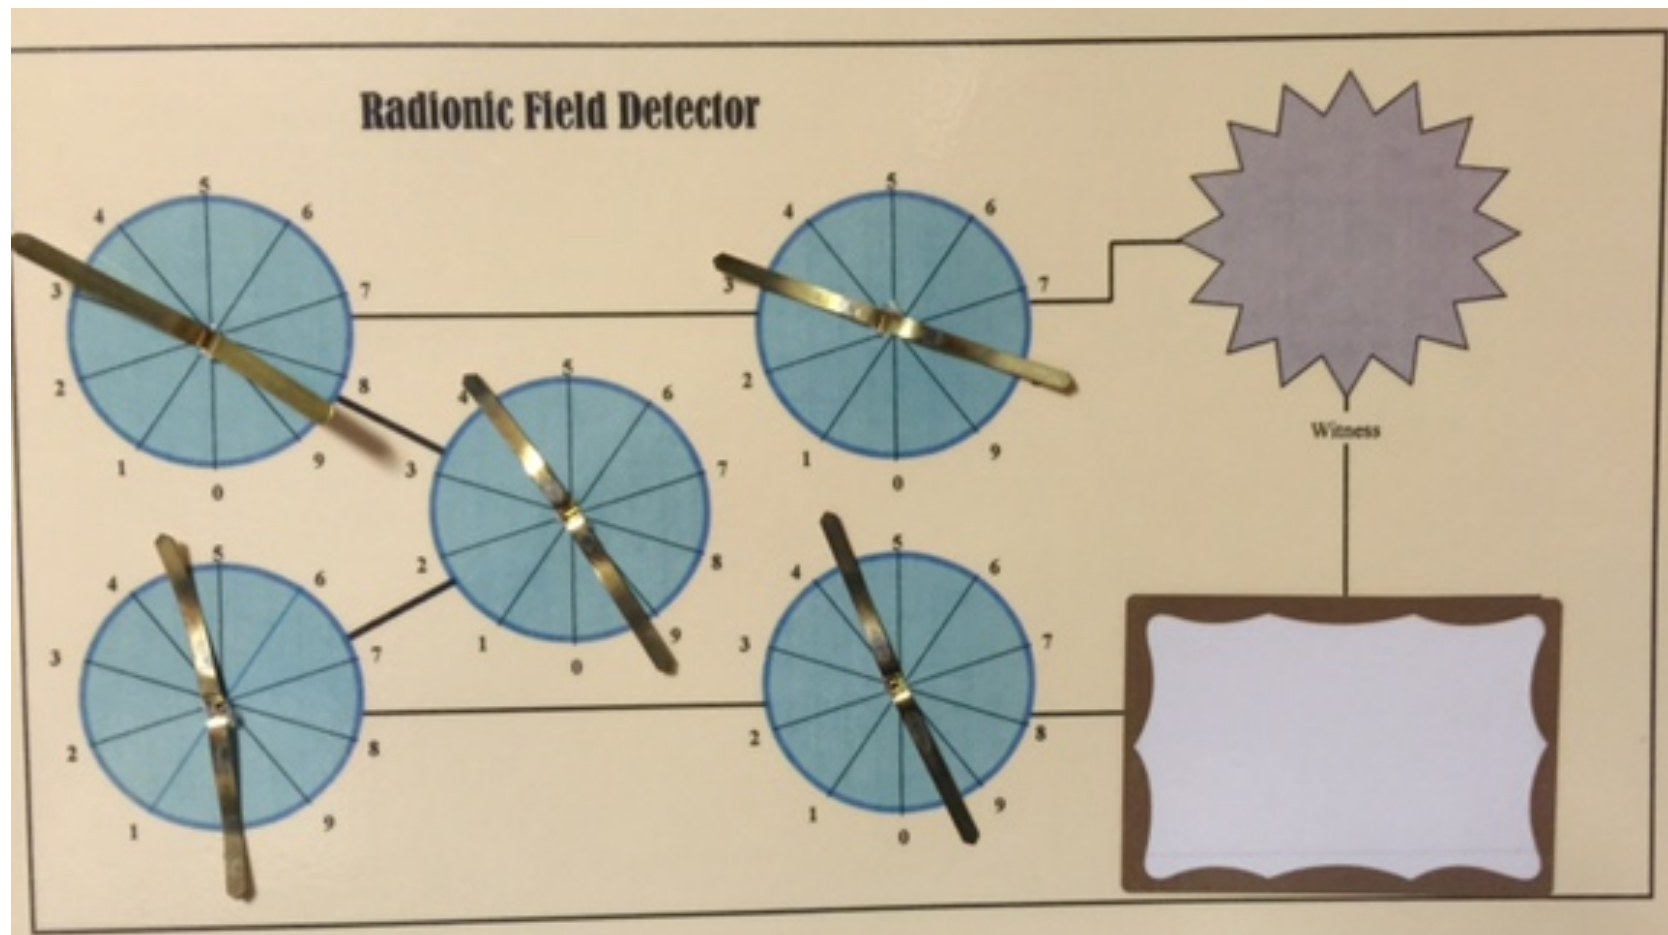

RADIONICS

Broadcasting The Frequency

A Radionics instrument can be used to broadcast a frequency as well as detect one. In fact, broadcasting is the most valuable thing one can do with such a device. There are a number of ways broadcasting can be done. I used this method recently to balance the energy of a client who was suffering with an irregular heartbeat: First, I obtained a witness from my client. In this case it was some saliva on a piece of blotter paper. I placed the blotter on the witness plate of my device. Then, using the dials and stick plate as described above, I obtained a five number rate, in this case 1-4-5-5-8. This was the rate of the affliction in question, *as it was occurring in that particular person at that particular time*. I then calculated the broadcast rate by subtracting the affliction rate from 100,000 (100000-14558). So the broadcast rate was 8-5-4-4-2. Leaving the witness on the witness plate, I then set the pointers, one number on each dial. That's all there was to it! Against all rational understanding, the device was operational. The condition cleared up in about three days and has not returned.

PRACTICAL HEALING TECHNOLOGY

BioGenesis is an ancient technology system, reintroduced and revealed to us by the ascended master Lantos. BioGenesis technology harnesses and instills energy from Source (Genesis) into the BioGenesis tools and transmits it to the intended individual. This energy also radiates throughout the environment in which the tools are placed.

The intention behind the BioGenesis tools is to restore harmony to your physical, emotional, mental and spiritual bodies as well as the places where you live, work and play. Each tool harnesses and transmits Genesis Energy, yet the unique design and effects of each individual tool initiates very specific actions, depending upon the intended purpose.

BIOGENESIS

WHAT CAN BIOGENESIS TOOLS DO FOR YOU?

Our bodies energetically heal as blocks and attachments are removed, as negative thought forms and limiting mental concepts are dissolved and as psychic bonds are severed and fragments of our spirits are retrieved. In using the tools, we surrender our wounds, traumas, missed understandings and wrong conclusions into truth and wisdom.

WITH BIOGENESIS, YOU CAN:

- Restore health and vitality
- Manifest your life goals
- Establish balance and harmony In your home, office or anywhere that needs balance

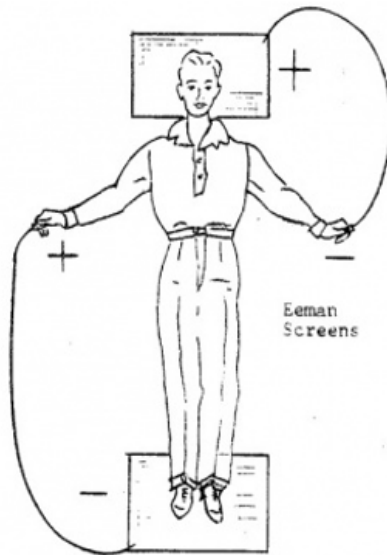

BioGenesis healing tools create emotional harmony and mental and spiritual clarity. With these tools you can bring profound manifestations of blessings, including financial prosperity, more energy and harmonious relationships.

As this Light returns to the lives on Earth, all things are made possible." --Ascended Master Lantos

Eeman Biocircuits

The L.E. Eeman Report *The Pioneering Years of Biocircuitry*

Compiled by Tom Brown

Leon Ernest Eeman
with additional materials added
to elucidate the subject matter.

British airman and inventor L.E. [Leon Ernst] Eeman, R.F., (May 15, 1889 – December, 1958) was the creator of the Eeman screens and proponent of his theory of the *X Force*, which he discovered after being disabled during the First World War (during which he served as an RAF officer, 2nd Lieut.) and sought to treat himself “by making unconscious processes conscious.” His Eeman biocircuits (or Eeman relaxation circuits, Eeman screens — pictured right) are formed using insulated copper wires, sometimes attached to copper mesh screens, that reportedly allow human bio-magnetic energy to be connected in such a way as to promote heightened states of relaxation, healing, and general healthfulness.

THOUGHT FORM CLEARING

- ◉ Ivor Francis/Diane Cantwell
- ◉ Crystallized thought forms made of subtle energy and eventually becomes a belief
 - They assume a floating form in the auric field
 - Positive thought forms assume a balanced symmetrical geometry
 - Negative thought forms assume amorphous non-geometric structure
 - Follow procedure to release thought forms

TESLA ENERGY LIGHTS

What are TESLA ENERGY LIGHTS™?

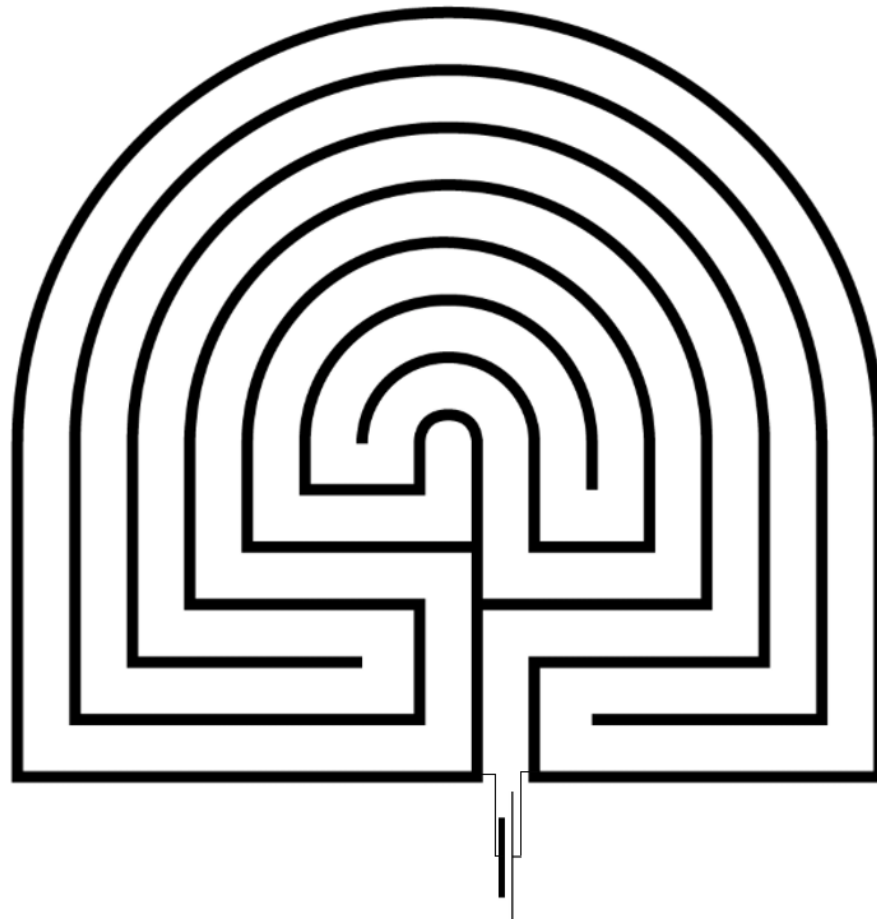

A Tesla Light System known as Tesla Energy Lights™ is a personal energy fueling system designed to donate electrons, recharge and permeate one's subtle energy bodies with compatible high frequency subtle energies.

TESLA ENERGY LIGHTS, P. 2

Because life force known as "subtle energy" is unseen, it is a soft commodity like the air we breathe, for it is necessary for all people, animals and plants to be alive. Tesla Energy Lights™ are specially formulated with very LOW voltage output so the energy can have a permeable influence of compatibility for our fragile electrical systems and soft delicate bio fields. The selected tubes we choose and their placement in the carousels are designed to deliver a full spectrum of harmonic ions emanating from our hand made proprietary noble gas crystal tubes. Heterodyning is possible by employing the yin and yang to harmonize profound shifts toward balance with our *EXCLUSIVE* 2 unit uni-polar system. Exposure to these frequencies can empower the user to enjoy clearer thinking, positive feelings and higher awareness by directing and interacting with balanced energies. We can now detect shifts objectively with Kirlian photography merged via computer algorithms to produce repeatable data. The energy measured on the GDV (Gas Discharge Visualization) camera reveals energy shifts in volume, symmetry and alignment for each and every person *without exception*.

Cold Lasers (also known as soft & low level lasers) work like sunlight on a garden. The sunlight donates energy (photons) which nourishes the plants to grow healthy and strong. Cold lasers donate energy/photons to cells which stimulates the mitochondria to produce more ATP, the energy engine of our cells. More ATP energy means healthier cells to regenerate and help the body heal itself!

TESLA PLATES

⦿ <http://www.swisstesla.com/>

Nikola **Tesla** called these **plates** "antennas or carriers of free energy". **Tesla Plates** raise the vibrational state of energy of the human body, as measurements with radionic devices indicate. **Tesla (Purple) Plates** can create a harmonizing field affecting body and soul positively.

How are Tesla Plates manufactured?

The plates are made of aluminum. The spin of the atoms and electrons of the aluminum is thus changed in such a way, that the Tesla Plates are said to vibrate in resonance with the fundamental energy (Chi, Prana, Orgon etc.) of the universe. The plates as we know them were originally developed by Ralph Bergstresser after a patent and from the knowledge / information and ideas of Nikola Tesla, with whom he worked for a certain time. The field of the Tesla Plates is changed and interacts with Tachyons. The surface of the Tesla Plates has a crystal-structure. Their chemical composition is the same as that of rubies and sapphires. We know that rubies give energy and thus were called "life-stones" in the Middle-Ages.

TESLA PLATES

The origin of the Tesla Plates

Nikola Tesla himself used similar plates in several patents and called them antennas for free energy. They are said to transfer information from the "**Schumann-Field**" to the human aura. So the human (or any living) organism can bring itself back into an equilibrium on several levels and increase its vibrational frequency. The Tesla Plates are said not only to work as antennas but also as transmitters. Their field penetrates every material with positive energy.

The "Schumann-Field" is the natural magnetic field between the Ionosphere and Earth's surface. Dr. Schumann was a physicist from Munich, who detected the biological effectiveness of this field. Every living organism on earth needs these stimuli. Especially we human beings react very strongly, if our connection to this field is disrupted.

Natural disturbances can occur because of effects of the weather. Other reasons may be due to technical influences like AC, machines, motors, broadcast stations etc. Shielding from this natural field occurs very often in cars and ferro-concrete buildings.

Tesla called the Schumann field an energetic matrix for the life on Earth; a magnetic field and information storage at the same time. Remember, we too use magnetic fields for storage in audio- and videotapes, computerdiscs etc.

Today's Purple Tesla Plates were made very well known by the book "**Star Signs**" (click the title to read an excerpt) by the famous writer and astrologer Linda Goodman. She attributed the most marvelous characteristics to these plates.

The Tesla Plates offered here are manufactured in Switzerland, where they have been further developed. They come in different sizes, forms and colors, for different purposes. They are neither FDA approved nor do they replace medical therapy or supervision. See disclaimer.
